DETAILED ACTION

Oath/Declaration

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because: there is no date of execution for the first listed inventor.

Specification

2. The abstract of the disclosure is objected to because it is not on a single page free of extraneous material. Correction is required. See MPEP § 608.01(b).

Claim Objections

3. Claims 5-8 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

4. Claims 1-4 and 9 are objected to because of the following informalities:

The use of the phrase “characterized by” and “characterized in that” is not conventional US Patent Office terminology.

Claims 2 and 9 do not end in a period.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-4 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1 and 9 it is unclear as to what is meant by “superplasticizer C-3”, “Lignopan B” and “hydrophobing agent (139-282)”. These are considered indefinite as they appear to be trademarks and the relationship between a trademark and the product it identifies is sometimes indefinite, uncertain or arbitrary. The formula or characteristics of the product may change from time to time and yet it may be sold under the same trademark. In the claims, every element or ingredient of the composition should be set forth in positive, exact, intelligible language so that there will be no uncertainty as to what is meant. Arbitrary trademarks which are liable to mean different things at the pleasure of manufacturers do not constitute such language. See MPEP 608.01(v). Ex parte Kattwinkel 12 USPQ 11.

In claim 1 it is unclear as to the types of fixing salts that may be utilized.

In claim 3 the terms “coarse” and “fine” are relative term which renders the claim indefinite. The terms are not defined by the claim, the specification does not provide a

standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

Information Disclosure Statement

7. Applicant is reminded of the duty to disclose any prior art that is relevant to the instant invention.

References Cited By The Examiner

8. The references have been reviewed by the examiner and they are not considered to teach and/or fairly suggest the instant invention.
